

Find the chord shapes on a Baritone Ukulele

To find out what a baritone ukulele chord looks like, find the chord you want to play on the outer (**blue**) ring, then read the corresponding chord on the inner (**yellow**) ring. e.g. If you want to know how to play **A Major** on a baritone ukulele, find **A** on the outer ring, the corresponding chord on the inner ring is **D**. So you play the chord of **A Major** on a baritone ukulele in the same way as you would play **D Major** on a soprano/concert/tenor ukulele.

If the chord is a **minor**, or **7th** or whatever, just carry it across so you play **Dm** on a baritone ukulele in the same way as you would play **Gm** on a soprano/concert/tenor ukulele.
