

# Adding music to Power Music Reader using a Compressed file

*These instructions refer to importing music files for the Roydon Ukulele Group.  
Music files for the Roydon Guitar Group are imported in the same way.*

Begin by deleting all current files from Power Music Reader so you don't get confused between old and new versions of the same song.

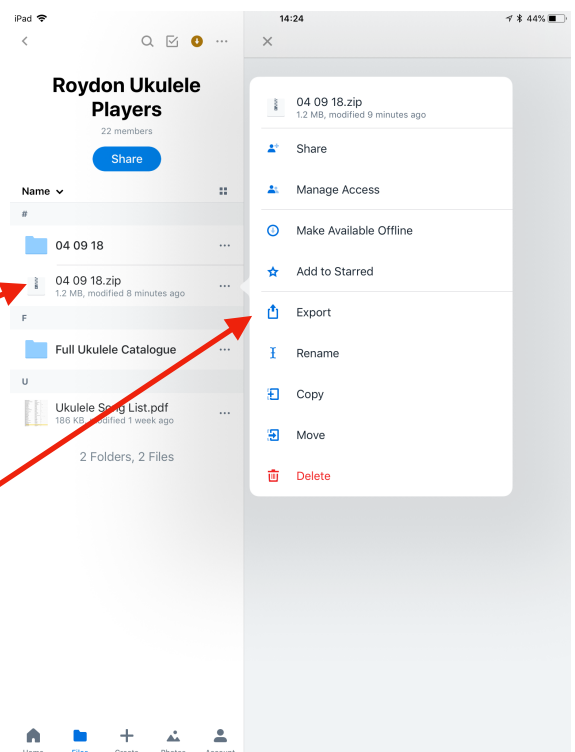

Open **DropBox** on your Tablet.

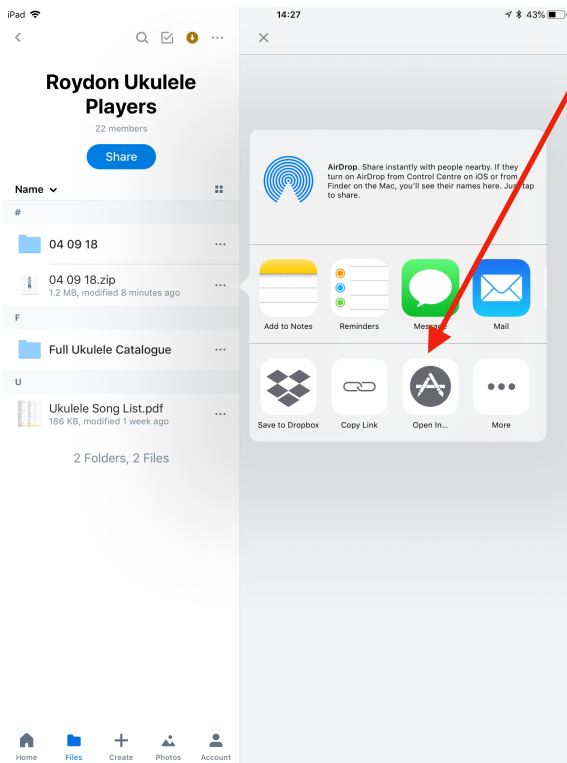

Go to **Files...**

and choose **Roydon Ukulele Players**.

You'll see a compressed folder named as the date of the next meeting followed by .zip (which denotes a compressed file).

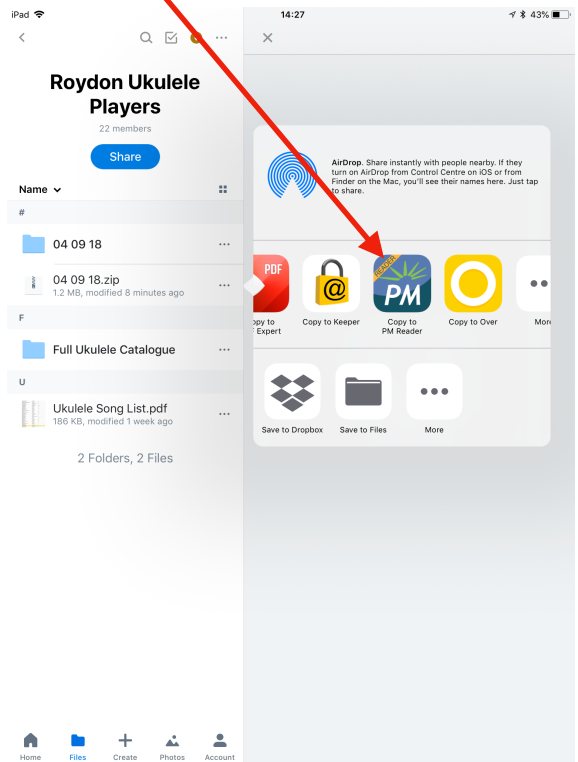

On the right of the file is an ellipsis (...). Touch it to open a menu and choose **Export**.

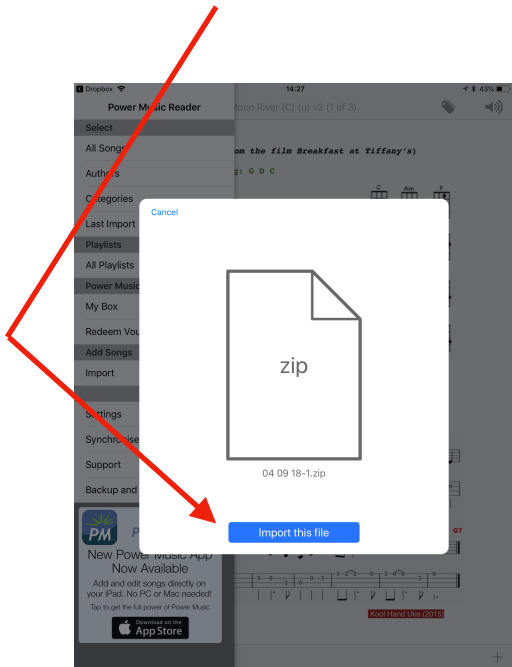

A window pops up. Choose **Open in...** from the bottom row.

The window then changes for a similar window. Scroll across until you see **Power Music Reader** and select that icon.

**Power Music Reader** now automatically opens with the Import window displayed. Choose **Import this file**.

A list of music contained in the compressed file is displayed. Choose **Select All** and then **Import**.
